

Are you an energetic graduate with an enquiring mind? Or an analytical electronics enthusiast? We want YOU!!!!

Our client SIEMENS is a globally prominent industrial automation and software manufacturer at the forefront of developing intelligent infrastructure for buildings, transport solutions, distributed energy systems and healthcare technologies. Within the Technical Services and Solutions team of SIEMENS, there are currently two Apprenticeship vacancies to be filled by inquisitive, dedicated, proactive and technically minded individuals.

This apprenticeship opportunity will expose you to challenging projects, ‘hands on’ learning opportunities, and will familiarise you with terminology and activities including: fault finding, panel wiring, parts selection and installation and the commissioning of projects. You will be mentored throughout the 4 years of apprenticeship which will include on site work and classroom lessons. The outcome of your 4 years of dedication and learning will be a qualification as a Commissioning Engineer.

If you are interested in finding out more about the above role and would like to be considered for this or other suitable roles that we may have available for your skill set – please attach your CV via the link provided or email your updated CV to siemans@osborne.ie. Please submit your updated CV in Word Format

If you are living in Ireland and hold a VALID WORK PERMIT, we would love to hear from you, if however, you do not hold a valid work permit unfortunately we will not be in a position to assist you with your job search.

Osborne are proud to be an Equal Opportunity Employer.
